

## CRONO MOBILE APPLICATION

### Regulations for the use of the infusion pump monitoring app by users and caregivers

#### Introduction

The **CRONO**® infusion pump monitoring app is a tool designed to assist users and their caregivers in monitoring and managing infusion therapy.

#### Rules for Use

##### 1. Personal Access and Confidentiality

- Access to the app is personal and confidential. Registration credentials (username and password) must not be shared with unauthorised persons.
- Users and caregivers must keep their credentials secure and must not record them in places accessible to others.

##### 2. Proper Use of the App

- The app must be used solely to monitor the infusion pump and to manage information relating to the therapy.
- It is forbidden to modify or tamper with infusion pump data contained in the app without prior authorisation from healthcare personnel.

##### 3. Protection of Personal Data

- All data entered and displayed in the app are strictly personal and must be handled confidentially.
- It is prohibited to share sensitive information with unauthorised third parties.

##### 4. Updates and Maintenance

- Users and caregivers must keep the app up to date, promptly installing any updates provided to ensure optimal security and functionality.
- In the event of malfunctions or technical issues, users must promptly contact technical support or their healthcare professional.

##### 5. Device Security

- Do not use public or unsecured Wi-Fi networks to access the app, in order to avoid the risk of data interception.

##### 6. Responsibility

- The user and/or caregiver are responsible for the proper use of the app and for maintaining the security of their credentials.
- In the event of loss or suspected theft of credentials, it is mandatory to immediately inform technical support or the healthcare professional.

#### Final Provisions

This regulation must be read, understood, and accepted by the user and/or caregiver before the app is activated. Failure to comply with these rules may result in suspension of access to the app and other potential consequences.
